Summer 2010

Get in the Green!

We are pleased to partner with the Costa Mesa Sanitary District, the County of Orange, the Orange Coast College Recycling Center, and others to deliver recycling services and *Get in the Green*. You can, too!

Nos complace anunciar que estamos trabajando conjuntamente con el Distrito Sanitario de Costa Mesa, con el condado de Orange, con el Centro de Reciclaje de Orange Coast College, y con otras organizaciones para llevarles los servicios de reciclaje. Para obtener información sobre los programas y servicios, por favor llame a las agencias ó visite sus páginas de Internet.

Cleaning up around your home?

Whether you are cleaning out the garage or a storage shed, clearing your backyard, or preparing for a move, you might have a lot of discards. If you have more than will fit into your trash cart, we can help! Every summer, the Costa Mesa Sanitary District sponsors a Large Item Collection Program to help residents with curbside trash collection dispose of items too large for standard pickup. This year's program runs from June 21 through August 20, 2010.

Two weeks prior to your large item collection, you will be notified of the pickup date for your neighborhood with a yellow door hanger. On your designated collection day, you may place your oversized items at the curb.

© iStockphoto.com | John Evans

Large items include mattresses, sofas, tables and chairs, miscellaneous furniture, lumber in bundles of 4' or less weighing no more than 50 pounds, large glass or mirrors, and appliances, such as ovens, washers, dryers, refrigerators, and water heaters.

Costa Mesa Sanitary District will **NOT** pick up electronics, tires, concrete, dirt, lumber over 4' in length, asphalt, tanks, building materials, construction debris, propane tanks, and fluorescent tubes and ballasts. Many of those

items are considered household hazardous wastes and may be dropped off, free of charge, at any county-operated Household

Hazardous Waste Collection Center.

Unfortunately, multi-family complexes and commercial businesses using dumpster service may not participate in this program and should arrange large-item collection with their regular waste hauler.

© Sergej Razvodovskij | Dreamstime.com

Recycle at the curb!

Did you know that you can include recyclables in your regular trash and still improve our environment? After your trash is picked up

Bag your clean, dry paper products separately to keep them from getting contaminated by trash.

© iStockphoto.com | Doug Cannell

from your home, your waste hauler takes it to a materials recovery facility (MRF). There, the trash is sorted by hand and with mechanical processes to separate and remove recyclables and to help meet California's 50-percent solid waste recycling requirement. Recyclables are sorted by type, washed (if appropriate), then compressed, baled, and sold to recyclers. Thanks for doing your part to keep trash out of our landfills!

To help keep your paper clean for recycling, please place your paper products into a separate plastic bag. This will ensure that your paper products do not come into contact with wet or dirty items in your trash. Paper products such as cardboard pizza boxes cannot be recycled if they are contaminated with fat, oil, and grease from foods. Do not mix contaminated paper with your clean paper in your plastic bag.

To prevent contamination of your recyclables and to properly dispose of fat, oil, and grease in your regular trash, please secure these materials in a strong, sealed container.

Después de que la basura de su hogar es recogida, se lleva a las instalaciones de recuperación de materiales. Ahí se esculca la basura para separar todo lo que es reciclable. La basura reciclable es entonces separada por categorías, se lava si es necesario, se comprime y empaqueta y se vende a recicladores.

Por favor ayúdenos a mantener los papeles reciclables limpios colocándolos por separado en una bolsa de plástico. Al hacer esto evitará que los productos de papel tengan contacto alguno con otros artículos mojados o sucios de la basura. Productos de papel, tales como cajas de pizza, no deben de ser reciclados si están contaminados con residuos de grasa y aceites de la comida. No mezcle los productos de papel contaminados con los que están limpios en la bolsa de plástico.

Para prevenir que los reciclables se contaminen y desechar adecuadamente residuos de aceites, mantecas y grasas, colóquelos en un envase sólido con una tapa bien cerrada antes de echarlos al bote de la basura.

Dear Residents:

The City of Costa Mesa is committed to bringing you the latest in waste and recycling news! However, please note that this will be the final printed issue of "One Person's Trash..." as we transition to providing this information online. Future news can be found on the city's website: www.ci.costa-mesa.ca.us. Waste and recycling questions may also be addressed to PUBSRV@ci.costa-mesa.ca.us. Thank you for your readership and for your continued dedication to recycling.

Costa Mesa Department of Public Services

Estimados Residentes:

¡La Ciudad de Costa Mesa está comprometida a llevarles las últimas noticias respecto a basura y reciclaje! Sin embargo es necesario que tomen nota que esta es la última edición impresa del boletín "One Person's Trash..." ya que estamos en transición para proveer esta información vía Internet. En el futuro podrá encontrar nuestras noticias en la página de Internet de la ciudad: www.ci.costa-mesa.ca.us. Cualquier pregunta sobre la basura y el reciclaje puede dirigirse a PUBSRV@ci.costa-mesa.ca.us. Muchas gracias por su patrocinio y por su continua dedicación al reciclaje.

Departamento de Servicios Públicos de Costa Mesa

Food, glorious food

Each year, Americans throw away about 27% of the food they purchase and bring home. When added to unusable food from farms, factories, and stores, food waste tops a whopping 100 billion pounds! And waste isn't the only result — a 2009 study found that a quarter of U.S. water consumption and over 300 million barrels of oil go into producing and distributing food that ends up in landfills.

Annually, food waste comprises about 12.7% of municipal trash, or about 200 pounds per person per year. A family of four disposes of \$590 worth of edible food each year.

Yet, unlike containers, paper products, and yard trimmings, very little food is recovered. Only about 2.5% is recovered, either for use or composting.

At home, you can reduce your food waste by using the 3 R's — Reduce, Reuse, and Recycle:

- Reduce your food waste at home. Make a list before you shop. Purchase only the amount of food that you need for the meals you will be eating at home. Avoid exotic ingredients that are needed for a single recipe. Adjust recipes to make the amount your family needs. Store leftovers in the refrigerator or freezer.
- Reduce food waste at restaurants. If portions are large, share a full order with your companion. When you are full, put leftovers into a carry-out container. Better yet, bring your own reusable container from home and put leftovers into it. Remember to eat the leftovers soon!
- Freeze food for future use. If you bought too many carrots, you can chop them up and freeze them. They'll be ready to toss into a nice soup next winter.

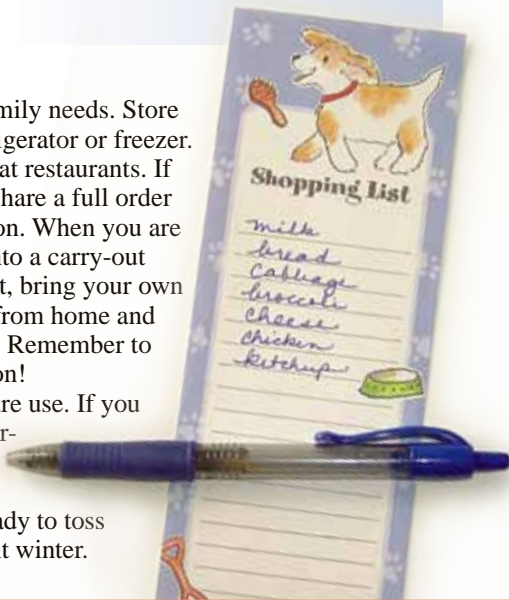

Most food in the U.S. travels between 1,500 and 2,000 miles before being eaten.

— Iowa State University

La mayoría de los alimentos en Estados Unidos viajan un promedio de 1,500 a 2,000 millas antes de ser consumidos.

— Universidad del Estado de Iowa

- Share unwanted food with friends and co-workers. Do you have left-over birthday cake? Invite a neighbor over for a slice or take the extra to work.
- Donate unneeded food products to local food banks and other charitable organizations. Go through your non-perishable boxed and canned goods regularly. If an item has been sitting in your pantry for six months, you probably aren't going to use it before the expiration date. Give it to someone who will use it.
- Give away unwanted produce. If you have a garden, share nature's bounty with friends, neighbors, and co-workers. If you purchased too much produce or your family just didn't like the plums, give the items away before they rot.
- Compost your food scraps. You can compost fruit and vegetable scraps, as well as bread, pasta, and grains, in your backyard compost pile. Bury the food about 10" below the surface to discourage unwanted visitors. You can also compost food scraps in a vermicompost (worm composting) bin indoors or an in-ground food composter outdoors.

Comida, Bendita Comida

Cada año, los americanos tiran a la basura aproximadamente 27% de la comida que compran y llevan a casa. ¡Cuando agregamos esa cifra a la comida que se desperdicia en granjas, fábricas y tiendas, la cifra llega a alcanzar unas increíbles 96 billones de libras!

Anualmente el desperdicio de la comida alcanza un 12.7% de la basura municipal, o sea unas 197 libras por persona por año. Una familia de cuatro personas desperdicia unos \$590 de comida comestible cada año.

Sin embargo, a diferencia de envases, productos de papel y poda del jardín, una cantidad mínima de la comida es recuperada. Sólo el 2.5% es recuperada para ocuparla o procesarla para su descomposición.

Usted puede reducir la cantidad de comida que se desperdicia en su hogar siguiendo las reglas de las 3R's — Reducir, Reusar y Reciclar:

- Reduzca el desperdicio de comida en su hogar. Haga una lista antes de ir de compras. Compre sólo la cantidad de comida que necesite. Evite ingredientes que sólo vaya a ocupar para un sólo platillo. Aproveche los sobrantes ya sea refrigerándolos o congelándolos.
- Reduzca el desperdicio de comida en los restaurantes. Si las porciones son bastas, comparta el platillo con otro de los comensales. Cuando ya esté satisfecho, pida que le ponga los sobrantes en un envase para llevar a casa.
- Congele la comida para consumirla en el futuro.
- Comparta la comida que ya no quiera con sus amigos y sus compañeros de trabajo.
- Si cuenta con latas o cajas de comida no expirada, dónela a una dispensa o a cualquier organización sin lucro de fondos.

- Regale verduras de su hortaliza que no vaya a consumir.
- Prepare sus sobras de comida para que se descompongan biológicamente. Los sobrantes de frutas y verduras, así como del pan, pastas y granos pueden ser tratados para su descomposición. Colóquelas en un cajón especial, por lo menos a unos 6-10" debajo de la superficie para evitar visitantes inesperados. Otro método de descomposición que puede hacer en el interior es a través de gusanos o el método de un cajón enterrado para depositar los alimentos.

FAST FACTS

Trashy TV

You've probably heard someone say, "Everything on TV is trash." We have a feeling they didn't mean the kind of trash you might find on TV today. On cable shows like "Dirty Jobs," "Hoarders," "Mission: Organization," "Hoarding: Buried Alive," and "Wa\$ted," trash and recycling take center stage. Even a couple episodes of "Undercover Boss" focused on waste.

In a recent issue of *Waste & Recycling News*, "Dirty Jobs" host Mike Rowe said, "Our focus is more on people and work, but the environment is a factor in virtually every segment, and recycling is quite possibly the biggest recurring theme."

Rather than watching re-runs this summer, check out some of the trashy shows on TV. You'll be surprised and probably a little grossed-out, but you won't look at waste the same way again!

"Hoarding: Buried Alive" is one of the shows that focuses on waste.
(Photo courtesy of Discovery Communications, Inc.)

Couch abandonment

A recent survey found that millions of Americans will abandon or leave behind large furniture on their next move. In this situation, one resident's trash may not be the next resident's treasure!

Rather than abandon perfectly good furniture or appliances that you don't want or can't take with you, make arrangements to sell or donate them. List them for sale in the local paper or online through a service such as Craigslist.com or AmericanListed.com. To donate, contact friends or charitable organizations. If transportation is a problem, ask whether pickup service is available.

If the furniture or large appliance is worn-out or broken, contact us about proper disposal.

© Jordan Rusev | Dreamstime.com

Abandono de Sofás

Una encuesta reciente encontró que millones de americanos abandonan o dejan muebles grandes al mudarse. En tales situaciones, la basura de un residente deja de ser el tesoro de otro residente.

En lugar de dejar abandonados muebles viejos o enseres del hogar, véndalos o dónelos. Anúncielos para la venta en el periódico local y en el Internet, a través de servicios como los de Craigslist o American Listed.com. Para donarlos, póngase en contacto con sus amigos o con una organización sin lucro de fondos. Si el problema es el transporte, pregunte si ofrecen el servicio de recoger los artículos.

Si los muebles o enseres están viejos o descompuestos, llámenos para disponer de ellos apropiadamente.

Basura en la Televisión

Probablemente haya escuchado alguna vez la expresión: "Todo en la televisión es basura." Tenemos un presentimiento que eso no quiere decir la clase de basura que hoy en día encontramos en la televisión. En series del cable, tales como "Dirty Jobs," "Hoarders," "Mission: Organization," "Hoarding: Buried Alive," y "Wa\$ted," se le da mucha importancia al tema de la basura y el reciclaje. Incluso un par de episodios de la serie "Undercover Boss" se enfocaron en la basura.

Green and gorgeous

Choosing products that are better for the environment doesn't mean sacrificing style. From purses to glassware, clever entrepreneurs are making treasures from our trash.

Several companies are taking car parts, including license plates, tires, and seatbelt strapping, used billboards, metal pull-tabs, and discarded wrappers to make purses. Because used materials are made to fashion the purses, many of the patterns are unrepeatable. You'll find these unique bags at gift shops, as well as at online stores, such as www.ecoist.com and www.niokagreenstore.com.

The Green Glass Company takes used drink bottles and turns them into beautiful glassware. Green Glass began with a unique wine bottle-to-goblet conversion process to fashion functional and eye-catching wineglasses. That has led to other products, including

a new line of tumblers made from soft drink and beer bottles. The company's designs take ordinary bottles and turn them into extraordinary glasses, pitchers, and vases. To see Green Glass products, which are sold in gift shops as well as online, visit www.greenglass.com.

Green Glass makes these tumblers from Boylan soda bottles.

Candy and gum wrappers were folded and woven to create this purse.

Verde y Hermoso

El escoger productos que benefician al ambiente no significa tener que sacrificar el estilo. Desde bolsas hasta anteojos, empresarios intrépidos están creando novedades con nuestra basura.

Algunas compañías ocupan partes de carros, incluyendo las placas del auto, llantas y las correas de los cinturones de seguridad, utilizan pizarrones publicitarios, las tapaderas de metal de refrescos y las envolturas de jugos

envasados para hacer bolsas. Puede encontrar estas bolsas singulares en tiendas de regalos o en sitios del Internet como www.ecoist.com y www.niokagreenstore.com.

La empresa The Green Glass Company utiliza botellas usadas de bebidas y las convierte en bellas piezas de vidrio. Los diseños de la compañía utilizan botellas comunes y las transforman en vasos, jarras y floreros extraordinarios. Visite la página de Internet www.greenglass.com para ver los productos que ofrece la compañía, los cuales también están a la venta en tiendas de regalos.

QUOTES REQUOTED

Photo credit: Annie Griffiths

I can plant something as an act of faith in time itself, a vow that we will, sure enough, have a fall and a winter this year, to be followed again by spring

Maybe life doesn't get any better than this, or any worse, and what we get is just what we're willing to find: small wonders, where they grow.

**Barbara Kingsolver, 1955-
Small Wonders
American author**

CITAS CITABLES

Puedo plantar algo como un acto de fe en el mismo tiempo, una promesa de que seguramente tendremos un otoño y un invierno, seguidos otra vez por la primavera....

Quizás la vida no puede ser mucho mejor, ni mucho peor, y lo que tenemos es sólo lo que estamos dispuestos a encontrar: pequeñas maravillas, ahí donde crecen.

**Barbara Kingsolver, 1955-
Small Wonders (Pequeñas Maravillas)
Autora americana**

One Change

© Raanan Mori | Dreamstime.com

If you were going to make one change this month, what would it be? Here's an idea—a reusable coffee mug! This year, Americans will carry out 23 billion paper cups filled with coffee and

other hot drinks. If you buy one cup of coffee per week, you could avoid 52 disposable cups, lids, and sleeves by carrying your own mug. If you buy one cup of carry-out coffee per work day, you could reduce your waste by 250 disposable cups, lids, and sleeves. If you buy two cups of carry-out coffee every day... well, you get the idea. In addition to reducing your waste, you might also be saving money. Many shops will give you a discount if you bring in your own mug.

Don't forget reusable cups for cold drinks, too!

Un Cambio

Si tuviera la oportunidad de cambiar una sola cosa este mes, ¿qué haría? Que le parezca esta idea – ¡use una taza para el café que pueda volver a usar! Este año, los americanos utilizarán 23 billones de vasos de papel para tomar café u otra bebida caliente. Si usted está comprando una taza de café a la semana, podría ahorrar 52 vasos desechables, tapas y faldas para los vasos con tan sólo usar su propia taza. Además de que ayuda a reducir basura, también puede que ahorre dinero. Muchos negocios ofrecen descuentos a los clientes que llevan su propia taza.

¡Y no olvide llevar su termo también para las bebidas frías!

WHAT'S UP?

Do you change your vehicle's motor oil? Be sure to recycle your used motor oil and oil filters! Call one of the Costa Mesa Used Oil Collection Centers for hours of operation and quantities accepted before delivering your oil for recycling. A list of the centers

is available by calling 1-800-CLEANUP (1-800-253-2687) or logging onto www.1800cleanup.org.

¿Por favor recicle el aceite del motor y el filtro del aceite usados! Llame a uno de los centros autorizados para la colecta del aceite usado de Costa Mesa para verificar horario de trabajo y cantidades aceptables antes de que pase por ahí. Puede obtener una lista de los centros disponibles llamando al 1-800-CLEANUP (1-800-253-2687) o checando la página de Internet www.1800cleanup.org.

Do you have pocket change sitting in your trash? You may! Most beverages packaged in aluminum, glass, and plastic containers are part of the California Refund Value program (marked with "CRV" or "CA Cash Refund"). You can redeem empty CRV containers and get a refund of the deposit you paid when you purchased the drinks. In Costa Mesa, redeem your containers at the Orange Coast College Recycling Center, located on Adams Avenue between Harbor Boulevard and Fairview Road. The redemption center is open Monday through Saturday, 9 a.m. to 5 p.m. For more information about the Orange Coast College Recycling Center, call 714-432-5131 or visit www.orangecoastcollege.edu/about_occ/facilities/recycling_center/.

La mayoría de las bebidas en envases de aluminio, vidrio y plástico participan en el programa California Refund Value (marcados con las letras "CRV" o "CA Cash Refund"). En Costa Mesa puede canjear sus envases en el centro de reciclaje Orange Coast College, ubicado en Adams Avenue entre Harbor Boulevard y Fairview Road. El centro opera de lunes a sábado, de 9 a.m. a 5 p.m. Para obtener más información sobre este centro, llame al 714-432-5131 o consulte la página de Internet www.orangecoastcollege.edu/about_occ/facilities/recycling_center/.

Are you ready for a long-term commitment?

When your family chooses home improvement products, cleaning supplies, and lawn and garden chemicals, you aren't just making decisions about how to do one job, such as spraying weeds or painting furniture. You're also making some commitments. First, you're committing to follow label instructions carefully. Second, you're signing up to store a potentially hazardous product in your home or garage. And finally, you're agreeing to dispose of leftover chemicals properly and safely. That's a lot of responsibility for a bottle of spray or a bucket of paint! Are you sure you want to take all of that on?

By choosing less hazardous products, you'll have more time for fun and more space to store cool stuff, and you'll ensure that your family and the environment are healthier, too!

Think less hazardous. Try these ideas:

- Whenever possible, use hard work instead of chemicals. If you put your arm muscles to work, a scrub brush or discarded toothbrush can do a lot of cleaning in the bathroom or kitchen. Use those arm muscles in the garden to pull weeds, too.

- Make your own household cleaners with baking soda, vinegar, salt, cornstarch, lemon juice, and other common products. To find recipes, go online and search for "non-toxic homemade cleaners" or visit www.eartheasy.com/live_nontoxic_solutions.htm.

- Buy the least hazardous product for every job. For instance, if you need to paint your room, choose latex paint, which is non-toxic

and water-based. You'll be able to clean your brushes and pans with water, so you won't need flammable paint thinners for cleanup.

- Purchase only the amount you need. For jobs like painting and lawn care, know how many square feet you need to cover so that you don't buy too much.

Quando su familia escoge productos para proyectos del hogar, productos de limpieza, químicos para el jardín y la hortaliza, no solo está seleccionando la manera en que llevará a cabo el trabajo, como matar las hierbas malas o pintar un mueble. ¡También están adquiriendo compromisos! Primero: seguir cuidadosamente las instrucciones en la etiqueta. Segundo: almacenar adecuadamente los sobrantes de productos tóxicos en su hogar o en su garaje. Tercero: desechar adecuadamente los sobrantes de productos químicos. ¡Esto es mucha responsabilidad por una botella de aerosol o un bote de pintura! ¿Está seguro que quiere aceptar estas responsabilidades?

Considere la alternativa de escoger productos que son menos tóxicos y preparar sus propios productos de limpieza usando bicarbonato, vinagre, sal, maicena, jugo de limón y otros productos comunes. Encuentre recetas a través del Internet, buscando bajo "non-toxic homemade cleaners." Cuando compre productos, seleccione los menos dañinos para cada trabajo, tales como pintura de látex, la cual no es tóxica y es de agua. Finalmente, compre solo la cantidad que va a necesitar.

No importa lo que haga, su familia siempre tendrá algún residuo de basura tóxica del hogar (household hazardous waste HHW). Recuerde desechar adecuadamente este tipo de basura, incluyendo los productos para el cuidado del jardín y la hortaliza, líquidos de automóviles, pinturas y productos para trabajos del hogar, productos de limpieza, químicos para piscina, baterías, artículos con contenido de mercurio tales como focos y tubos de luz fluorescente, termómetros y termostatos viejos.

El departamento de Waste & Recycling del Condado Orange facilita a su familia el desecho adecuado de materiales tóxicos y de electrónicos viejos, aceptando estos tipos de basura en cualquiera de sus cuatro centros Household Hazardous Waste Collection Centers. El más cercano para los residentes de Costa Mesa se encuentra en 17121 Nichols Street - Gate 6, Huntington Beach. El horario de trabajo semanal es de martes a sábado, de 9 a.m. a 3 p.m. (Cerrado en días festivos y días de lluvia.) Por ley estatal queda prohibido transportar más de 15 galones o 125 libras de químicos tóxicos por viaje.

Cada uno de los centros de Household Hazardous Waste Collection ofrece un programa de intercambio de materiales. Puede seleccionar hasta cinco artículos sin cargo alguno, desde envases usados para el hogar y el jardín, hasta productos para el cuidado del automóvil.

Para mayor información, llame a OC Waste & Recycling al 714-834-6752, o consulte la página de Internet www.oilandfills.com, entrando a "Hazardous Waste."

Did you know?

Orange Coast College Recycling Center, which is located on Adams Avenue between Harbor and Fairview, buys back CRV bottles and cans (see "What's Up?"). But did you know that the facility also accepts other recyclables on a donation basis?

You can drop off e-waste, such as computers and cell phones; household batteries; scrap metal; old appliances; all types of paper, including magazines and books; and reusable clothing. Donation items are accepted daily from 9 a.m. to 5 p.m.

CRV bottles and cans are ONLY accepted Monday through Saturday during open hours.

This facility does not accept furniture, auto or marine batteries, used motor oil, or any type of hazardous waste.

El centro Orange Coast College Recycling Center, ubicado en Adams Avenue entre Harbor y Fairview, compra botellas y latas reciclables del programa CRV (SOLO se aceptan de lunes a sábado durante horas laborables. Vea la sección "What's Up?").

Sin embargo, se aceptan donativos de otros productos reciclables, incluyendo: productos electrónicos (e-waste) como computadoras y teléfonos celulares; baterías del hogar; residuos de metal; enseres viejos; todo tipo de papel, incluyendo revistas y libros; y ropa en buenas condiciones. Las donaciones se aceptan todos los días de 9 a.m. a 5 p.m.

Este centro no acepta muebles, baterías marinas o de automóviles, ni aceite usado del motor y o cualquier tipo de basura tóxica.
